Russian - Fluent

Summary

Motivated Full-stack Developer with hands-on experience building responsive web applications using React, Node.js, TypeScript, and REST APIs. Skilled in developing clean UI components, state management, and full-stack feature integration. Currently pursuing a Bachelor's Degree in Software Engineering with full flexibility to adjust my study schedule for work.

Project experience

Phonebook - [GitHub](#). Individual project, a Phonebook with a personal account, where you can create, filter and delete your contacts.

[React, Router, Custom hook, Redux, Persist, Mockapi, Material UI, Webpack]

Healthy hub - [GitHub](#). Pleasant and user-friendly web page designed for health tracking based on your goals. Featuring intuitive navigation, diverse formulas, and graphics, platform effortlessly helps users monitor progress and make informed decisions. Section - **Dashboard**. Role: **Scrum master, Developer**.

[React, Router, Custom hook, Redux, Persist, react-chartjs-2, Node, Webpack]

Bookshelf - [GitHub](#). An application for purchasing or searching for books. It has good-looking design, modal windows, responsive layout, burger menu, pagination, loader and scroll up. My section is called - **Book Modal window**. Role: **Developer**. [HTML, SASS, JS, AJAX, REST API(Swagger), Parcel]

Phonebook REST API - [GitHub](#). Individual project. A server for managing contacts with user authentication, JWT authorization, password hashing, and input validation. Supports full CRUD operations for contacts and avatar processing. [Node.js, Express, MongoDB, Mongoose, JWT, Joi, REST API, Multer]

Studio - [GitHub](#). My first individual project. It's a simple web page with a burger menu on the phone version. [HTML, CSS, JS]
